

Tentative d'installation d'un reverse nginx avec let's encrypt sur un rpi2 :

https://homeserver-diy.net/wiki/index.php?title=Installation_et_configuration_d%E2%80%99un_reverse_proxy_avec_NginX
https://homeserver-diy.net/wiki/index.php?title=Utilisation_d%27Nginx_comme_reverse_proxy_avec_un_certificat_auto-sign%C3%A9,_Let%27s_Encrypt_et_un_chiffrement_fort

```
sudo apt install -y nginx
```

```
sudo nano /etc/nginx/conf.d/proxy.conf
```

```
cd /opt
```

```
sudo apt install -y git-core
```

```
sudo git clone https://github.com/letsencrypt/letsencrypt
```

```
cd /letsencrypt
```

```
sudo mv /etc/nginx/sites-enabled/default /etc/nginx/sites-enabled/ori.default
```

```
sudo nano /etc/nginx/sites-enabled/default
```
